SUCCESSFULLY IMPLEMENT THE CURRICULUM

As an open education resource, OpenSciEd strives to ensure that all school districts, regardless of budget or size, can provide teachers with the high quality professional learning they deserve.

Through careful engagement with classroom videos, real student work, student and teacher interviews, and a deep dive into the unit materials, OpenSciEd’s professional learning fosters a meaningful understanding of the units — providing teachers and districts with the tools they need to feel confident implementing equitable science instruction in their classrooms!

PROFESSIONAL LEARNING SESSIONS

PILOT LAUNCH  
VIRTUAL OR ON-SITE

Considering OpenSciEd? The Pilot Launch is designed to provide teachers with an overview of OpenSciEd and give teachers the necessary tools to try a unit in their classroom.  

Starts at $3,500 for one facilitator over 1 day

CURRICULUM LAUNCH  
VIRTUAL OR ON-SITE

Supports teachers in understanding the shifts called for by the NGSS and the Framework for K-12 Science Education. The launch will prepare teachers to teach their first OpenSciEd unit.  

Starts at $24,750 for three grade level facilitators over 3 days

UNIT DEEP DIVE  
VIRTUAL OR ON-SITE

Supports science teachers in advancing their understanding of the OpenSciEd approach while going deep into a specific science unit for context.  

Starts at $18,000 for three grade level facilitators over 2 days

CUSTOM PROFESSIONAL LEARNING  
VIRTUAL OR ON-SITE

We recognize the challenge of finding time for professional learning as part of a pilot. We can work with your district to create a structure for professional learning that meets your unique constraints.
